JOB DESCRIPTION JUNIOR ENGINEERING SURVEYOR

ROLE PURPOSE:

As a Junior Engineering Surveyor, you will support the delivery of accurate survey data for infrastructure and construction projects across the UK. Working under the guidance of experienced surveyors and project managers, you will assist with site surveys, setting out, and data processing while developing your technical skills and industry knowledge.

KEY RESPONSIBILITIES:

- Assist in carrying out engineering and topographical surveys using total stations (Leica & Trimble), digital levels, GNSS equipment, and laser scanning systems.
- Support the establishment and maintenance of site control networks and benchmarks.
- Assist with setting-out works for civil engineering, rail, and construction projects.
- Help ensure surveying equipment is properly maintained and calibrated.
- Support the processing and checking of survey data using industry-standard software such as AIC N4ce, AutoCAD, and Leica Infinity.
- Assist in producing accurate drawings, reports, and survey deliverables in line with project and client requirements.
- Work closely with senior surveyors, site engineers, and project teams to ensure survey requirements are met.
- Adhere to company quality, health, safety, and environmental procedures at all times.
- Support continuous improvement by learning best practice survey methods and techniques.

OTHER ACCOUNTABILITIES:

- Being fully aware of and actively complying with Munnelly Group's policies and procedures relevant to your own responsibilities.
- Maintain a positive and proactive attitude always respecting fellow Team Members.
- Play an active role in the leadership of the business inspiring a team centred culture of excellence and high performance.
- Keep equipment and your work area clean and tidy as far as reasonably possible.
- Performing any other reasonable duties as directed by line management.

- Initiating continuous improvement in your own areas of responsibility and feedback on own performance, in one to ones and PDR's.

This list should not be regarded as exhaustive, and the role holder will be expected to deliver other duties relevant and appropriate to the role.

PERSON SPECIFICATION:

- Some experience or practical exposure to land or engineering surveying.
- Basic knowledge of modern survey equipment (Leica and/or Trimble preferred).
- Willingness to learn survey control, setting-out, and data processing techniques.
- Good attention to detail and a proactive approach to work.
- Strong communication skills and ability to work as part of a team.
- Full UK driving licence or working towards.
- CSCS card or willingness to obtain.
